DETAILED ACTION

1. Claims 26 and 51-64 are presented for examination. Applicant filed an Amendment on 1/27/2006 amending the specification. After carefully reviewing Applicant's amendment, the Examiner withdraws the outstanding rejections of the claims. Therefore, claims 26 and 51-64 are allowed.

Allowable Subject Matter

2. Claims 26 and 51-64 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The claimed invention is directed to a system and method for generating authorized payments from financial accounts belonging to payers in payment of debts belonging to payees. The prior art, as evidenced by Pat. No. 5,383, 113, Kight et al., discloses a payment system for receiving information requesting a payment including an amount of the payment to be applied to an account. The prior art also discloses using information identifying an institution authorized to generate the payment from the account and validating the information identifying the institution by comparing it to authenticated information. Moreover the prior art discloses generating a request that the identified institution generate the payment of the identified amount from the account. However, the prior art does not explicitly "an operator entering payment information with respect to a new payer who has not previously authorized payments through the system, or is unknown to the system, for making payment orders". This feature is found in independent claims 26, 55, 58, and 61.
